### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS; WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 40 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Antecedent basis is missing for "said spiral cutout".

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 19-22, 25, 36-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Gadhok.

Gadhok in figs. 3-4 discloses a galvanometer comprising a rotor 108 having a tail shaft with a bearing 122 received on said tail shaft, and a diaphragm spring 126 engaged with said bearing, said diaphragm spring providing a predetermined axial force on said bearing (col.6, lines 21-22), and an optical element 110 coupled to said rotor.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 23, 24, 39, and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gadhok in view of Kumagai.

Gadhok discloses the claimed invention except that Gadhok shows a spider spring instead of a stepped-spiral spring. Kumagai shows that a stepped-spiral spring is an equivalent structure known in the art. Therefore, because these two were art-recognized equivalents at the time the invention was made, one of ordinary skill in the art would have found it obvious to substitute for a stepped-spiral spring for a spider spring.

7. Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gadhok in view of Nakamura.

Gadhok does not disclose wherein said diaphragm spring comprises a plurality of upstanding tabs engageable with the bearing. Nakamura discloses a spring having a plurality of upstanding tabs engageable with an output shaft for the purpose of engaging the spring with the shaft. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ a plurality of upstanding tabs in Gadhok's spring for the purpose of engaging the spring with the bearing.
